

PRICING INFORMATION FOR EMDS PRACTICE CHOICE

Practice Choice: Subscription fee is per provider per month. There are four separate subscription types - Premium, Connect, Standard, eRX Only. Included functionality will vary base on the type subscription. All subscriptions include access to support resources, knowledgebase articles, and regular software updates. To support Meaningful Use, customers are required to purchase the premium package.

Content that is included at no additional cost (including updates as needed and dependent on the subscription type chosen): Patient Education, ICD, CPT, HCPCS, Templates, Health Maintenance, Other Clinical Decision Support, Drugs, ePrescribing of Controlled substances.

Not included: Direct Messaging for non-provider staff (onetime setup fee plus annual subscription per staff member), Additional interfaces (One time setup fee plus monthly maintenance), eCQM reporting and electronic submission with FIGmd (onetime registration fee and annual subscription fee per provider)

Capability and Certification Criteria	Description of capability	Premium	Connect	Standard	eRX Only	Limitations (Contractual / Business Practices)	Limitations (Technical / Practical)
<p>Electronic Prescribing of Medications Certification Criteria: §170.314(a)(1) Computerized provider order entry (CPOE) of Medications</p>	<p>Electronic Prescribing: Allows licensed providers, that have prescribing privileges, to send prescriptions electronically to pharmacies. Sending prescriptions electronically, via fax or, printing is included in the base price of the product. This also included the prescribing of controlled substances. eMDs, Practice Choice partners with DxWeb for transmission of electronic prescriptions. Practice Choice also partners with DxWeb for ID Proofing. If the provider is located in a state that requires two factor authentication, there is an additional monthly fee.</p>	X			X	<p>ID Proofing is required one time. This is a requirement of Surescripts to confirm the identity of the provider. If the provider is located in a state that requires two factor authentication, there is an additional monthly fee.</p>	<p>Requires internet connection. Prescriptions can only be sent electronically to pharmacies that have enabled this capability. This is outside the control of eMDs or any other electronic health record. Related to ID Proofing, providers will need to assure that there is not a block on their credit history. This could represent a delay in obtaining the necessary validation for ID Proofing.</p>
<p>Laboratory Interface Certification Criteria: §170.314(a)(1) Computerized provider order entry (CPOE) of Laboratory and §170.314(b)(5) Incorporate laboratory tests and values/results.</p>	<p>HL7 Results Interface-Lab. Users will have the ability to set up an interface connection that allows for the import (receiving) of results. This includes, but is not necessarily limited to, laboratory results. For a full list of laboratories that are currently supported for each product line, contact our sales team at sales@e-mds.com. Subscription fee includes unlimited interfaces with no setup fees. The third party may choose to pass on the setup cost to the customer.</p>	X				<p>Contract required for Quest Laboratory or required with Atlas for all other Laboratories. Atlas would act as a "middle-man" between Choice and other lab systems. Subscription fee includes unlimited interfaces with no setup fees. The third party may choose to pass on the setup cost to the customer.</p>	<p>Requires internet connection. Any entity wishing to connect must comply with the standards specified by ONC which is HL7 2.5.1. In order to meet the ONC requirements for certification eMDs cannot deviate from this standard.</p>
<p>Radiology (X-ray) Interface Certification Criteria: §170.314(a)(1) Computerized provider order entry (CPOE) of Radiology/Imaging</p>	<p>HL7 Results Interface-Radiology (X-ray). Users will have the ability to set up an interface (connection) with a radiology facility thereby allowing the import of their radiology results as a text based report (this does not include images). For a full list of facilities that are currently supported for each product line, contact our sales team at sales@e-mds.com. Subscription fee includes unlimited interfaces with no setup fees. The third party may choose to pass on the setup cost to the customer.</p>	X				<p>Contract required for Quest Radiology or required with Atlas for all other Radiology results. Atlas would act as a "middle-man" between Choice and other lab systems. Subscription fee includes unlimited interfaces with no setup fees. The third party may choose to pass on the setup cost to the customer.</p>	<p>Requires internet connection. Any entity wishing to connect must comply with the standards specified by ONC which is HL7 2.5.1. In order to meet the ONC requirements for certification eMDs cannot deviate from this standard. Radiology results are limited to text based reports. Images are not included.</p>
<p>Patient Portal Certification Criteria: §170.314(e)(1) View, download, and transmit to 3rd party.</p>	<p>Patient Portal. Practice Choice utilizes RealyHealth for Patient Portal functionality. This Patient Portal provides patient's access to their medical information and communication with their providers. It is an interfaced, secure internet-based solution that enhances the physician-patient relationship, improves quality of care and reduces operational expenses. From the Patient Portal, the user can also view their clinical information in a standardized, sharable format (CCDA formatted documents) that they can choose to download or send (transmit) to other providers via Direct Messaging protocols. The Patient Portal is offered as part of the core product for editions it is included with.</p>	X	X			None	Requires internet connectivity.

<p>Drug Formulary. Certification Criteria §170.314(a)(10) Drug-formulary checks</p>	<p>Drug Formulary. This functionality allows users to automatically and electronically check whether a drug formulary (or preferred drug list) exists for a given patient and medication. Additional information such as copay, relative cost and which medications are preferred by the insurance company are also available. This functionality is included in the base cost for the indicated subscriptions. Practice Choice partners with DxWeb to provide this functionality.</p>	<p>X</p>	<p>X</p>			<p>None</p>	<p>Requires internet connection. Eligibility checks must be run in order for formulary information to show in the application. Not all patients have insurance coverage that allows for formulary to be displayed.</p>
<p>Direct Messaging. Certification Criteria §170.314(b)(1) & (b)(2) Transitions of care: (b)(1) – receive, display, and incorporate transition of care/referral summaries.</p>	<p>Direct Messaging. Direct is a brand name for a specific protocol of secure messaging. Direct messages can be exchanged with any other user that has a Direct email address and that shares the DirectTrust association which is a collaborative non-profit association of 150 health IT and health care provider organizations to support secure, interoperable health information exchange via the Direct message protocols (https://www.directtrust.org/). Updox is the third party partner utilized by eMDs to supply Direct messaging capabilities.</p> <p>Provider: Inbound and outbound Direct messaging available. Providers have the ability to generate a transition of care CCDA file for a patient with referral details included and/or add free text messages. Inbound messages can contain attachments, including but not limited to CCDA files, that may be viewed or downloaded into patient charts. There are no additional fees due for this functionality for providers or to be part of the Surescripts HISP.</p> <p>Staff: Inbound and outbound Direct messaging available; however, staff members share a facility level Direct address. Users have the ability to generate a transition of care CCDA file for a patient with referral details included and/or add free text messages. Inbound messages can contain attachments, including but not limited to CCDA files, that may be viewed or downloaded into patient charts. Direct Messaging for non-provider staff requires a one-time setup fee plus annual subscription per staff member.</p> <p>Patient: Only outbound messaging is available for patients. These messages may only be sent to Direct email addresses as a security measure and mandated by certification. Patients may send their formatted clinical health history (CCDA) and/or free text.</p>	<p>X</p>	<p>X</p>			<p>Direct messages can be exchanged with any other user that has a Direct email address and that shares the DirectTrust association which is a collaborative non-profit association of 150 health IT and health care provider organizations to support secure, interoperable health information exchange via the Direct message protocols (https://www.directtrust.org/).</p> <p>There are no additional fees due for this functionality for providers or to be part of the Surescripts HISP.</p> <p>For non-provider staff members, there is an additional cost to obtain a direct address (one-time setup fee plus annual subscription per staff member).</p>	<p>Requires internet connection. Providers need to register to receive their Direct address, which is assigned to them. Direct address cannot be repurposed or shared outside of the eMDs system. Direct messages can be exchanged with any other user that has a Direct email address and that shares the DirectTrust association which is a collaborative non-profit association of 150 health IT and health care provider organizations to support secure, interoperable health information exchange via the Direct message protocols. Health Internet Service Provider (HISP). Surescripts is the third party partner utilized by eMDs to supply Direct messaging capabilities.</p>
<p>Immunization Registry Interface. Certification Criteria §170.314(f)(1) / §170.314(f)(2) Immunization information.</p>	<p>Immunization Registry Interface. Users will have the ability to set up an interface (connection) with a state or regional immunization registry, thereby allowing the export of their immunization data. For a full list of registries that are currently supported for each product line, contact our sales team at sales@e-mds.com. Subscription fee includes unlimited interfaces with no setup fees.</p>	<p>X</p>	<p>X</p>			<p>This functionality requires a business relationship with the immunization registry. Subscription fee includes unlimited interfaces with no setup fees.</p>	<p>Requires internet connection. Any entity wishing to connect must comply with the standards specified by ONC which is HL7 2.5.1. In order to meet the ONC requirements for certification eMDs cannot not deviate from this standard.</p> <p>For Practice Choice, this functionality is send-only interface from Practice to registry.</p>
<p>Syndromic Surveillance Certification Criteria: §170.314(f)(3) Transmission to public health agencies – syndromic surveillance</p>	<p>Syndromic Surveillance. Users will have the ability to set up an interface (connection) with a public health agency such as a city, county or state health department and export (send) diagnostic information that will assist public health professionals in assessing trends that may impact the public at large. Subscription fee includes interfaces with no setup fees.</p>	<p>X</p>	<p>X</p>			<p>This functionality requires a business relationship with the public health agency. Subscription fee includes interfaces with no setup fees.</p>	<p>Requires internet connectivity. Manual generation of the surveillance file is required. User will then need to manually upload file to the registry.</p>
<p>Document Exchange Certification Criteria: §170.314(b)(7) Data portability.</p>	<p>Document Exchange. Users will have the ability to generate patient specific documents in a standard format (CCDA files) in batches. These can be generated based on criteria such as the visit note date and/or patient. (This functionality does not include transport/sending the file.)</p>	<p>X</p>	<p>X</p>	<p>X</p>		<p>None</p>	<p>Requires internet connectivity. It is a manual process to generate the batch files.</p>
