Capability and Certification Criteria	Description of capability	Lytec MD	Medisoft Clinical	Practice Partner	Practice Partner with Relay Clinical Solutions	Limitations (Contractual / Business Practices)	Limitations (Technical / Practical)
<b>Electronic Prescribing of Medications</b> Certification Criteria: §170.314(a)(1) Computerized provider order entry (CPOE) of Medications	<b>Electronic Prescribing:</b> Allows licensed providers, that have prescribing privileges, to send prescriptions electronically to pharmacies. Sending prescriptions via fax or, printing is included in the base price of the product. Prescribing electronically is an add on module with an associated maintenance cost. This does not included the prescribing of controlled substances. Practice Partner works with RelayHealth for transmission of electronic prescriptions.	X	X	X	X	Electronic Prescribing is a separate add-on module to Partner that is associated with an additional annual maintenance fee.	Requires internet connection. Prescriptions can only be sent electronically to pharmacies that have enabled this capability. This is outside the control of e-MDs. Related to ID Proofing, providers will need to assure that there is not a block on their credit history. This could represent a delay in obtaining the necessary validation for ID Proofing.
<b>Laboratory Interface</b> Certification Criteria: §170.314(a)(1) Computerized provider order entry (CPOE) of Laboratory and §170.314(b)(5) Incorporate laboratory tests and values/results.	<b>HL7 Results Interface-Lab.</b> Users will have the ability to set up an interface connection that allows for the import (receiving) of results. This includes, but is not necessarily limited to, laboratory results. For a full list of laboratories that are currently supported for each product line, contact our sales team at sales@e-mds.com.	X	X	X	X	Loading the Lab message file is included in PPConnect, an add-on module, that has a one-time license fee and annual maintenance fees.  Customer's can contract with e-MDs to establish the inbound interface for file transmission for a one-time setup fee and annual maintenance fees.	Requires internet connection. Any entity wishing to connect must comply with the standards specified by ONC which is HL7 2.5.1. In order to meet the ONC requirements for certification e-MDs cannot deviate from this standard.
<b>Radiology (X-ray) Interface</b> Certification Criteria: §170.314(a)(1) Computerized provider order entry (CPOE) of Radiology/Imaging	<b>HL7 Results Interface-Radiology (X-ray).</b> Users will have the ability to set up an interface (connection) with a radiology facility thereby allowing the import of their radiology results as a text based report (this does not include images). For a full list of facilities that are currently supported for each product line, contact our sales team at sales@e-mds.com.	X	X	X	X	Loading the Radiology message file is included in PPConnect, an add-on module, that has a one-time license fee and annual maintenance fees.  Customer's can contract with e-MDs to establish the inbound interface for file transmission for a one-time setup fee and annual maintenance fees.	Requires internet connection. Any entity wishing to connect must comply with the standards specified by ONC which is HL7 2.5.1. In order to meet the ONC requirements for certification e-MDs cannot deviate from this standard. Radiology results are limited to text based reports. Images are not included.

<p><b>Patient Portal</b> Certification Criteria: §170.314(e)(1) View, download, and transmit to 3rd party.</p>	<p><b>Patient Portal.</b> Practice Partner currently offer 2 options for Patient portal:</p> <ol style="list-style-type: none"> <li>1. Practice Partner offers an integrated add-on module module, WebView, for Patient Portal functionality. WebView provides patient's access to their medical information and communication with their providers. It is an integrated, secure internet-based solution that enhances the physician-patient relationship, improves quality of care and reduces operational expenses.</li> <li>2. Practice Partner interfaced with RelayHealth's patient portal via API calls and CCD transmission.</li> </ol> <p>From either Patient Portal option, the user can also view their clinical information in a standardized, sharable format (CCDA formatted documents) that they can choose to download or send (transmit) to other providers via Direct Messaging protocols.</p>	x	x	x	x	<p>WebView is included in the current bundled Partner package.</p> <p>For customers choosing the RelayHealth portal, a one time setup fee and annual maintenance fee is required.</p>	<p>Requires internet connectivity.</p>
<p><b>Drug Formulary.</b> Certification Criteria §170.314(a)(10) Drug-formulary checks</p>	<p><b>Drug Formulary.</b> This functionality allows users to automatically and electronically check whether a drug formulary (or preferred drug list) exists for a given patient and medication. Additional information such as copay, relative cost and which medications are preferred by the insurance company are also available. This functionality is included in the base cost.</p>	x	x	x	x	<p>None</p>	<p>Requires internet connection. Eligibility checks must be run in order for formulary information to show in the application. Not all patients have insurance coverage that allows for formulary to be displayed.</p>
<p><b>Direct Messaging.</b> Certification Criteria §170.314(b)(1) &amp; (b)(2) Transitions of care: (b)(1) – receive, display, and incorporate transition of care/referral summaries.</p>	<p><b>Direct Messaging.</b> Direct is a brand name for a specific protocol of secure messaging. Direct messages can be exchanged with any other user that has a Direct email address and that shares the DirectTrust association which is a collaborative non-profit association of 150 health IT and health care provider organizations to support secure, interoperable health information exchange via the Direct message protocols (<a href="https://www.directtrust.org/">https://www.directtrust.org/</a>). Updox is the third party partner utilized by e-MDs to supply Direct messaging capabilities.</p> <p><b>Provider:</b> Inbound and outbound Direct messaging available. Providers have the ability to generate a transition of care CCD file for a patient with referral details included and/or add free text messages. Inbound messages can contain attachments, including but not limited to CCD files, that may be viewed or downloaded into patient charts.</p> <p><b>Staff:</b> Inbound and outbound Direct messaging available; however, staff members share a facility level Direct address. Users have the ability to generate a transition of care CCD file for a patient with referral details included and/or add free text messages. Inbound messages can contain attachments, including but not limited to CCD files, that may be viewed or downloaded into patient charts.</p> <p><b>Patient:</b> Only outbound messaging is available for patients. These messages may only be sent to Direct email addresses as a security measure and mandated by certification. Patients may send their formatted clinical health history (CCDA) and/or free text.</p>	x	x	x	x	<p>Direct messages can be exchanged with any other user that has a Direct email address and that shares the DirectTrust association which is a collaborative non-profit association of 150 health IT and health care provider organizations to support secure, interoperable health information exchange via the Direct message protocols (<a href="https://www.directtrust.org/">https://www.directtrust.org/</a>).</p> <p>There is an annual per-user subscription fee associated with Direct Messaging. The user can be provider or staff.</p>	<p>Requires internet connection. Providers need to register to receive their Direct address, which is assigned to them. Direct address cannot be repurposed or shared outside of the e-MDs system. Direct messages can be exchanged with any other user that has a Direct email address and that shares the DirectTrust association which is a collaborative non-profit association of 150 health IT and health care provider organizations to support secure, interoperable health information exchange via the Direct message protocols. Health Internet Service Provider (HISP). Surescripts is the third party partner utilized by e-MDs to supply Direct messaging capabilities.</p>
<p><b>Immunization Registry Interface.</b> Certification Criteria §170.314(f)(1) / §170.314(f)(2) Immunization information.</p>	<p><b>Immunization Registry Interface.</b> Users will have the ability to set up an interface (connection) with a state or regional immunization registry, thereby allowing the export of their immunization data. For a full list of registries that are currently supported for each product line, contact our sales team at <a href="mailto:sales@e-mds.com">sales@e-mds.com</a>.</p>	x	x	x	x	<p>This functionality requires a business relationship with the immunization registry.</p> <p>Unloading of immunization file is included in PPConnect, an add-on module, that has a one-time license fee and annual maintenance fees.</p> <p>Customer's can contract with e-MDs to establish the outbound interface for file transmission for a one time setup fee and annual maintenance fees.</p>	<p>Requires internet connection. Any entity wishing to connect must comply with the standards specified by ONC which is HL7 2.5.1. In order to meet the ONC requirements for certification e-MDs cannot not deviate from this standard.</p> <p>For Practice Partner this functionality is send-only interface from Practice to registry.</p>
