

PATIENT

Redefining Patient Engagement

Meet Sally. Sally is a 55-year-old patient who recently suffered a knee injury at work. Let's learn more about how your practice might use Updox PCA to reduce time spent on phone calls, voice mails and fax; eliminate staff rework; and save Sally time while improving her overall patient satisfaction.

Frequently Asked Questions about Updox PCA and Patient Portal

Can you use Updox PCA alongside eMDs Patient Portal?

Absolutely! Work has been completed on both eMDs and Updox sides to ensure there is a connection for the two systems to work simultaneously while also working with your EMR.

What is the value for using these two solutions together?

Updox PCA + Patient Portal combined enable your practice to work more efficiently while improving patient outcomes. Take the headache out of practice communication and patient engagement. PCA + Patient Portal seamlessly integrate with eMDs to provide practices with easy-to-use and mobile-friendly solutions consolidated into a single platform.

What are the main benefits of switching to eMDs Patient Portal powered by Updox?

Patient Portal powered by Updox is certified and integrated with Practice Partner and Solution Series. The eMDs Patient Portal has a modern interface that is both desktop and mobile friendly. Customizable by practice and easy to access, it enhances the practice reputation by engaging patients on THEIR device of choice. eMDs Patient Portal makes communicating with patients easy and manageable within the Updox Inbox.

What are the main benefits of using Updox PCA?

Updox PCA is an all-in-one collaboration platform that consolidates all of your administrative and engagement activities within a single platform. Leveraging PCA alongside Patient Portal allows practices easily and efficiently communicate with patients while limiting the solutions they employ at the practice to just one coupled with their EHR.
